

# OmniLux™

is a new multifocal lens concept  
that will give your practice  
a competitive advantage

## THE BENEFITS

OMNILUX™ is a premium product  
that can be offered at a premium price.

Simplifies the sales process due to the multitude of  
brand name and lens design offerings. OMNILUX™  
is suitable for all multifocal patient needs.

Reduces valuable dispensing time since OMNILUX™  
requires no fitting height.

OMNILUX™ is available in all existing lens materials  
and treatments.

The OMNILUX™ lenses are measured, ordered, and  
dispensed the same as Single Vision lenses, where  
only Pupil Distance measurement is required.

### When Ordering:

Minimum recommended "B" of 34mm.  
Make sure the frame, when sitting on the patient's face,  
has a pantoscopic tilt of 9°+ to achieve  
the best visual performance.

### When verifying:

The Distance Reference Prism Reference Point (PRP),  
Layout Reference Point (LRP) coincide with  
the Engraving Reference Point (ERP).

Engraving Marks = 34mm apart horizontally on the 180°.  
The PRP, LRP, ERP = 17mm centered  
between engraving marks.

The Distance Reference Point (DRP) is located  
12mm above the PRP, LRP, and ERP.

Near Reference point (NRP) = 3.0mm in and  
12mm below PRP, LRP, and ERP.

### When dispensing:

Once again verify the pantoscopic tilt when the frame  
is sitting on the patient's face is 9°+

NEXT LEVEL  
**REVOLUTIONARY**  
PREMIUM MULTIFOCAL LENS SOLUTION

Omnilux™ is a new concept in multifocal vision.  
**IT IS NOT A BIFOCAL, TRIFOCAL OR PROGRESSIVE (PAL) LENS**  
Omnilux™ is a NAL™ lens

Omnilux™ lenses provide a Single Vision viewing  
experience for patients with accommodation deficiency

## WHAT IS OMNILUX™

OMNILUX™ is the World's First Natural Accommodation Lens

# OmniLux™

Is a new proprietary Freeform lens that delivers multifocal performance with the look and feel of Single Vision lenses.

Is a multifocal lens with no waves, distortions, or corridors giving patients a Single Vision like visual experience at any age.

Is a multifocal lens that requires no fitting height just like a Single Vision lens.

" Think about this lens like it's Viagra™ for vision. It is so amazing, I believe for some, it will actually bring a visual experience they have never experienced before. "

Adam Bodnar, Pro Photographer

## PATIENT BENEFITS

### NO ADAPTATION PERIOD

First time multifocal wearers or design/brand change patients will experience instant visual comfort.

### NATURAL CLEAR MULTIFOCAL VISION

## NAL™ SUPERIORITY

NATURAL ACCOMMODATION LENS  
TECHNOLOGY OF TOMORROW  
AVAILABLE TODAY

## INSTANT VISUAL COMFORT IN ANY GAZE

PROVIDES ULTIMATE VISUAL PERFORMANCE FOR ANY LIFESTYLE OR VOCATIONAL NEED

## MORE COMFORTABLE

Continuous sharp natural vision at any gaze from distance to near without waves or distortions.

## AESTHETICALLY APPEALING

There is no visible line, blend zone, or corridor, OMNILUX™ lenses have the look of a Single Vision lenses with all the benefits of a multifocal.

**ELIMINATE** costly redos and non-adapt issues due to fitting height **ERRORS**
